A.T. Still University

Disclosure Regarding Academic Curriculum Requirements for Licensure

Federal regulations require ATSU to disclose to prospective and enrolled students whether a program leading to professional licensure or certification meets the educational requirements in each state and U.S. territory. Speech-language pathology is a licensed profession in all 50 states and some U.S. territories. To become licensed to practice as a speech-language pathologist, a student must graduate from a program accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association and pass the national certification examination for the speech-language pathology administered by Praxis. ATSU's Master of Science in Speech-Language Pathology degree program is a candidate for accreditation by CAA. This curriculum is designed to meet educational requirements for initial licensure to practice as a speech-language pathologist in every state and most U.S. territories.

State requirements for licensure are subject to change. These statements and program completion do not guarantee licensure. ATSU cannot provide verification of an individual's ability to meet licensure requirements unrelated to its educational program. Students are encouraged to review licensure requirements (including noneducational requirements such as certification/examination work experience, background checks, etc.) for the states in which they intend to seek licensure. To find additional details on state requirements, see the state-specific licensure information and contacts provided by the American Speech-Language-Hearing Association:

https://www.asha.org/advocacy/state/
